Bring your loved ones to hear directly from cancer genetics experts!

FROM OUR REGISTERED DIETITIANS:

There's no evidence
that consuming
sugar causes
cancer to develop or
spread - that's a
myth! Yes, excess
sugar should be
limited for everyone.
But, sometimes
when you're not
feeling well, carbs
and sweets are the
only things that sit
well. So, it's okay to
eat them in
moderation.

**For dietary
concerns, just ask
for a nutrition
services referral.**

Have you wondered about helping cancer patients in need?

[Cancer Connects](#) is a local not-for-profit
charity that provides support for cancer

patients through its Angel Fund. Donations to the Angel Fund allow Cancer Connects to pay for items such as medical copayments, health insurance premiums, groceries, transportation expenses, nutrition supplements, and general quality-of-life living expenses. To learn more or donate: [click here](#).
